

FLOWMETER SERIES FLUX 1 - 2

FLUX 1 and FLUX 2 flowmeters are devices used to measure the flow rate of compressed air in various areas of a pneumatic system.

The FLUX 1 comes with an anodized aluminium body and 1/2" threaded inlets and outlets for flow rates of up to 2,000 NI/min, while the FLUX 2 has an anodized aluminium body and 1" threaded inlets and outlets for flow rates of up to 4,000 NI/min. They are both available in the versions with or without display, with an M12 connector for power supply and signal control. The versions with display also feature a pressure and temperature transducer that minimises measurement error within the operating temperature range thanks to the algorithm implemented in the device software.

Flow rate, pressure and temperature values as well as graphs of instantaneous and cumulative values are displayed.

The electrical power used to produce the measured flow is also calculated and displayed.

A digital output (configurable for flow rate, pressure or total consumption) and an analogue output (configurable for voltage or current) are available for both sizes. Versions with IO-Link interface with similar characteristics are also available.

The Wireless versions are able to communicate with Ethernet networks (MQTT communication) and mobile devices, such as smartphones and tablets with Bluetooth® connection through a dedicated APP.

Through the APP, in addition to viewing the measured quantities, it is possible to change all the settings of the flowmeters and view the measured values in real time.

All FLUX flowmeters can be supplied with voltage ranging from 12VDC and 24VDC and perform the functions of a flowmeter and flow switch; all versions with a display can also be used as a pressure gauge or pressure switch.

The inner air ducts of the flowmeters are designed to ensure precise flow readings at all times without creating pressure drops between instrument inlet and outlet.

TECHNICAL DATA		FLUX 1	FLUX 2
Measured flow range	NI/min	0 to 2000	0 to 4000
Fluid		Compressed air free of any lubricants and inert gases	
Fluid temperature	°C	0 to 50	
Direction of flow		Unidirectional	
Measuring method		Thermal	
Working pressure range	bar	0 to 10	
	MPa	0 to 1

Activation time	Voltage 12 -10% 24 +30% min 1 sec	

● Accuracy referred to compressed air gas, at a pressure of 5 bar and a fluid temperature of 25°C $\pm 10^\circ\text{C}$.

▲ In order to guarantee the stated measurement accuracy and to prevent lubricant residues from damaging the measurement sensor, a filter has to be mounted at the FLUX inlet.
If the device is fitted with a Syntesi[®] filter, the SYN filter parameter must be enabled in the system menu to guarantee the stated accuracy (function available only for the version with display).

◆ Version without display: the digital input selects the type of analogue output from 0 to 10 V and 4 to 20 mA.

UNITS

FLOWMETER SERIES FLUX 1 - 2

The Metal Work FluxUp App can be used for connection via Bluetooth® to Metal Work flow meters in the FLUX 1 and 2 series with a wireless interface, from Android® smartphone and iOS®. With the Metal Work FluxUp App, you can view all data recorded by the FLUX and set all operating parameters in real time.

PNEUMATIC CONNECTION

To connect the inlet side, use a straight pipe* at least 150 mm-long for FLUX 1 and at least 200 mm-long for FLUX 2. If straight piping is not installed, the accuracy may vary from what is stated.

* **Straight pipe:** the pipe must be straight with a constant cross-section.

FLUX 1	L ≥ 150 mm	L1 ≥ 50 mm
FLUX 2	L ≥ 200 mm	L1 ≥ 50 mm

FIXING OPTIONS

Wall mounting by means M5 screws.

DIN rail mounting with bracket code 900099A001, using the M5x14 screws provided.

NOTES

ASSEMBLY DIAGRAM WITH SYNTESI®

- 1) Tighten the connection bushing on the flowmeter until it is flush (it is advisable to use sealant on the male thread of the bushing to ensure a perfect seal).
- 2) Unscrew the bushing slightly until two surfaces of the hexagon are parallel to the body of FLUX.
- 3) Insert the bushing into the Syntesi® unit.
- 4) Tighten the two self-tapping screws in the Syntesi® unit to a torque of 0.4 Nm for size 1 and torque 2.5 Nm for size 2.

FLUX 2 + SYNTESI® 2

N.B.: If the FLUX is used downstream a Syntesi® filter, fit it in one of the three positions shown in the figure.
