

Foot-Operated Interrupter FU

Foot-Operated Interrupter FU

Design

- Foot-actuated seat valve made of pressure-cast zinc
- Housing and protective cover made of nylon
- Gaskets made of oil-resistant rubber
- Available with or without locking function
- Designed as 3/2-way valve
- With filter on the venting outlet

Suitability for Industry Specific Applications

Applications

- Control of compressed air and vacuum at manual working positions, leaving the hands free for the actual work
- For use with clamping tables and vacuum workbenches
- Also for use in measuring and monitoring systems

Product Highlights

- Multiway valve with foot pressure control; hands remain free
- Made of robust zinc die-cast, suitable for vacuum and compressed air
- Manually controlled 3/2 multiway valve for connection, disconnection and ventilation
