## **Suction Cup Inserts SPI PEEK**

Suction area (Ø) from 6 mm to 32 mm

#### **Suitability for Industry Specific Applications**

#### **Applications**

- Suction cup inserts for gentle and mark-free gripping and depositing of smooth workpieces
- Application with crystalline solar cells, thin-film modules and wafers / substrates in the semiconductor area
- Handling of glass such as display glass, thin glass with thickness less than 0.1 mm or coated glass without leaving a chemical fingerprint by elastomers
- Use in combination with bellows suction cups FGA (1.5 folds) and FG (2.5 folds)

Suction Cup Inserts SPI PEEK

#### Design

- Suction cup inserts made of PEEK with support structure and vacuum channels
- Inserts are tool-free clipped into the lower suction cup fold of bellows suction cups

#### **Product Highlights**

- Suction cup inserts made of PEEK inserts prevent chemical fingerprints on thin, smooth workpieces
- Low surface pressure through support structure with flow slots and vacuum channels
- Intelligent vacuum distribution compensates for leaks and ensures high effective suction forces
